Get your safety surveys 24/7...

...That's how we roll.

Sign up now

24/7 Convenience...Anytime, Anywhere.

Evaluate is a simple tool to create and manage safety checklists and site audits. And, it includes tools to -manage your clients too.

Replace your paper forms with Evaluate and reduce your costs of printing and reproduction. And, you won't have to find a place to file all of that paper away. Evaluate creates and stores all of its documents for easy access at any time from any place via a web browser. And because the documents are stored electronically, they can be sent electronically too! Simply email files to customers.

GENIUS.

You'll see it in our software solutions...

Check out all our solutions...

We're Unique. We're in Las Vegas.

And, our innovative software products for the commercial, municipal and self insurance markets substantially reduce costs, create efficiencies and improve processes for you, the administrator.

About Us

CHSICONNECTIONS™
MANAGEMENT SYSTEM

Much more than just a enterprise management system because Connections was built by administrators for administrators! Connections incorporates powerful CRM, underwriting, billing, claims integration, broker and policy holder portals into a single cloud based insurance practice management system.

SOLUTIONS.

Genius Comes In All Shapes And Sizes.

CHSI Connections™ Management System

If you administrate a commercial or municipal insurance program, a self insurance group (SIG) or a captive, you will want to read more! Connections increases productivity and improves process for administrators by incorporating CRM, rating, billing, claims and policy holder and member facing portals into a single cloud based application.

Learn More

Evaluate

How cool is this? A site audit and safety survey tool that you can use online or offline on your tablet! No more paper checklists and clipboards and tripping around a job site with a camera around your neck. No more trying to make an online survey tool do something it wasn't meant to do!

Evaluate allows you to take your mobile device into the field to complete the survey or audit. You can take pictures and they will upload right then and there (if you're online of course). It effectively creates your final report while you're conducting the survey!

CHSI Connections™

The Product Of Pure Genius.

CHSI CONNECTIONS™
MANAGEMENT SYSTEM

Much more than just a enterprise management system because Connections was built by administrators for administrators! Connections incorporates powerful CRM, underwriting, billing, claims integration, broker and policy holder portals into a single cloud based insurance practice management system.

The Basics

Our client relationship management (CRM) module not only allows administrators to manage their accounts' contact information; it also includes integrated calendaring, tasks, notes and file storage. And, it includes the ability to create custom fields to collect data the way you want to. Committee and board member management tools are popular items within the CRM too.

Rating and Underwriting

Forget the spreadsheets and your old legacy underwriting system! Connections has a powerful rules based rating and underwriting module that will save you time by automating the collection of information and the creation of quotes and renewals. And, we can provide a customized, professional look and feel for all of your outbound documents.

Billing and Receivables

Premium and contribution billing can be complex and we know that the typical accounting system can't always do what you need. That's why our billing module allows you to easily carve premium and contribution dollars into the manageable pieces that you need to adequately report from. And, we'll provide all of the aging, earning and commission reports that you might be doing manually now. We even export the data into a file format that your accounting system can import from.

Claims Integration

We believe that there are some really good claims management systems out there so we don't do that (yet). What we do is integrate with your claims management system, where ever it may be. This allows us to import loss data into our rating and underwriting module and to quickly create loss runs, loss ratios and frequency reports. And, we can provide your entire organization access to loss data.

Portals

Policy holder and member facing portals provide self service access to program information, claims intake and review, online bill pay and more. You can even run your annual data collection process through them for renewals with our questionnaire module.

Data and Security

Cloud based means that you access our software through your web browser and are always using the most current version so there is never an upgrade to buy. It also means that you have no additional hardware or software to purchase. And, your data is safe in our SSEA-16 audited data center.

SOLUTIONS.

Genius Comes In All Shapes And Sizes.

The CHSI Team

The acronym that makes our name – Commitment, Honesty, Service and Innovation – is not fluff. These are the concepts that drive our business and our team every day. CHSI is fully committed to developing the most successful, long-term alternative risk programs. CHSI is SAS 70 certified annually, undergoes annual full financial audits by independent CPA firms, and is the only Workers' Comp provider in Nevada to receive clean audit reports from the DOI for the last 8 years. CHSI continues to develop and refine industry-leading customer service systems and technology, and tailors each insurance program to the specific needs of the client-group.

California Returns Workers´ Comp to "Bad Ole Days"

When the Fifth District Court of Appeal (DCA) in California refused to review the Workers Compensation Appeals Boards (WCAB) en banc decision in State Compensation Insurance Fund (SCIF) v. WCAB (Almaraz) on June 16, the Schwarzenegger administrations efforts to return sanity to the states workers compensation permanent disability system was dealt yet another perhaps fatal blow. While SCIF could appeal this decision to the California Supreme Court, that bodys failure last year to accept a defense petition in Joyce Guzman v. Milpitas Unified School District (Guzman), a Sixth DCA case that dealt with precisely the same legal issues as Almaraz, suggests such an effort would likely be futile. TECHNOLOGY AND INFORMATION SYSTEMS

The Technology and Information by Systems Services Division (TISS) provides technology related leadership, coordination, resources, and support needed to achieve the District mission. The division's responsibilities include operating and supporting enterprise-wide information systems, managing local and wide area networks, deploying bond-funded technology to classrooms and labs, providing telephone and communication services, managing video conferencing systems and offering user help desk services. TISS is organized into the following units:

- Central Information Systems
- Networking Services
- Program Office and Information Systems Help Desk
- School Technology Deployment Services
- Telecommunications Services
- User Support Services
